2 -138, Chittipalem, Machilipatnam, Krishna District, Andhra Pradesh, India

SUMMARY

I am a dedicated and innovative student pursuing a Btech in Artificial Intelligence & Machine Learning. I possess a strong foundation in programming and web development, complemented by practical experience acquired through internships and hackathons. My goal is to leverage my technical skills to contribute to impactful projects while continually enhancing my knowledge across evolving technologies

EXPERIENCE

Team Lead
Smart India Hackathon
11/2023 11/2023 Bangalore, India
Hackathon held at Rammiah university, Bangalore

Team Member
HACK $DAY Edition-1
12/2023 12/2023 Puducherry, Tamil Nadu, India
Hackathon organized by 0xDay and Pivot held at Sri Manakula Vinayagar Engineering College

Intern
Artificial Intelligence Medical Engineering Society AIMERS
05/2024 06/2024 AIMERS, India
Internship focused on AI technologies
- Worked on AI tools such as Visual Question Answering and Object Detection

Intern
Edunet Foundation
11/2024 12/2024 Edunet Foundation, India
Internship dealing with NLP and chatbot technology
- Developed an NLP-based chatbot using Python and Streamlit for improved user interaction

EDUCATION

Btech
GUDLAVALLERU ENGINEERING COLLEGE
08/2022 05/2026 Andhra Pradesh, India

MPC
PAVITHRA CO OPERATIVE JUNIOR COLLEGE
06/2020 05/2022 Andhra Pradesh, India

SSC
NELLORE'S RAVINDHRA BARATHI
06/2018 05/2020 Andhra Pradesh, India

CERTIFICATIONS

Certification on C language
Jawaharlal Nehru National Youth Center Issued Sep 2022
Skills: C (Programming Language)

Certification on python
Cisco Networking AcademyIssued Jul 2023
Skills: Python(Programming Language)

ML0101EN: Machine Learning with Python
A Practical Introduction IBM iX Issued May2024
Skills: Machine Learning

Python and Flask Framework Complete Course
Udemy Issued Aug2024
Skills: Flask(Python Framework)

KEY ACHIEVEMENTS

- **Smart India Hackathon Innovation**
  Led a team that developed a significant project during the Smart India Hackathon, showcasing innovation in technology
- **Development of NLP Chatbot**
  Successfully developed an NLP-based chatbot during my internship, significantly enhancing user experience

SKILLS

HTML CSS Flask Git GitHub
Python IBM JavaScript LLM
NLP Chatbot Python Streamlit
Visual Studio Code XAMPP C Language
SQLite Machine Learning

PROJECTS

HydroHub – Hackathon Project
01/2024 02/2024 Online
Website development project addressing water-related topics
- Developed a website for water-related topics with user authentication features
- Implemented backend connectivity and error handling

Street Light Controller for MSMEs
02/2024 03/2024 India
Hardware-based project focused on energy conser vation
- Utilized main components like LDRs and relays for functionality

Online Election System
11/2023 12/2023 Online
Web development project aimed at enhancing electoral processes
- Created a web-based online election system ensuring user security and data integrity
- Integrated database management for accurate results and transparency

NLP Chatbot
03/2024 04/2024 Online
AI-focused project developing a chatbot for user interactions
- Enhanced the chatbot using machine learning models for improved accuracy

INTERESTS

★ I am passionate about continuous learning in technology and I actively participate in hackathons to enhance my skills
